

1. Project overview

- Purpose: Manage, search, retain, and disposition metadata-only records (structured records, links, references).
- Scope: Metadata capture, classification, retention, audit, Locations, Department ...

2. Primary users & roles

- System Admin, Records Manager, Knowledge Worker, Auditor, External Guest (same role definitions; permissions apply to metadata).

3. Functional requirements

a. Record capture & ingestion

- Create records via web UI: structured forms, required/conditional fields, validation.
- Bulk import/export of metadata via CSV/xls.

c. Metadata model & classification

- Configurable record types and field schemas (field types: text, number, date, Enum, Boolean, user, link).
- Mandatory/optional fields, field-level validation, default values.
- Taxonomy, tags, hierarchical categories.
- Auto-classification rules and templated record type presets.

d. Search & retrieval

- Full-text search across metadata fields and tag values.
- Advanced filters and faceted search (date ranges, authors, record type, retention status, custom fields).
- Saved searches, result export (CSV/PDF).

e. Versioning & editing

- Version history of metadata changes with diff, revert, and audit of who changed which fields.
- Locking or optimistic concurrency controls.

g. Audit & logging

- Immutable audit logs for create/read/update/delete and disposition actions, field-level change details.
- Exportable, tamper-evident logs.

i. Reporting & analytics

- Standard reports: retention compliance, upcoming dispositions, activity by user, field/value distributions.
- Custom report builder and scheduled exports (CSV/PDF).

k. Import/export & eDiscovery

- Bulk import/export in CSV/xls with schema mapping.
- Legal holds preventing disposition; export includes chain-of-custody metadata.

Required Fields :

Field	Type	Validation
Entity	Alphanumeric (Drop Down List In the future)	-
Entity Code	Numeric	2 Digits
Department	Alphanumeric	-
Location	Text	16 characters
Box Barcode	Text	11 characters
File Barcode	Text	13 characters
Description	Text	-
Year	year	4 Digits
